DataRobot

Models Launched 50% Faster at £8.1B Global Auto Distributor

Inchcape

PRODUCT
DataRobot AI Platform
- AI Experimentation
- AI Production

INFRASTRUCTURE
Microsoft Azure
Databricks
Google Cloud Platform

INDUSTRY
Automotive

COUNTRY
UK

As it scales analytics to 200 business units, Inchcape relies on DataRobot for rapid experimentation and automation across the entire AI lifecycle — expediting value delivery and reducing time to market by more than half.

Challenge

Inchcape's newly formed global analytics group needed rapid experimentation to find the highest-value models and deploy them across 200 business units, plus a single platform to manage the entire AI lifecycle. The company needed to manage hundreds of models without accelerating costs.

Solution

DataRobot delivers a full AI lifecycle solution enabling fast proofs of concept for experimentation and quick deployment as well as monitoring of models in production. Critically, DataRobot connects via APIs with the company's technology ecosystem and the legacy systems acquired through occasional acquisitions.

Results

50% faster
creates, tests, and deploys a model

75% faster
identifies the best pricing across thousands of SKUs

within weeks
deploys an end-to-end solution in a market

"

"What we find really valuable with DataRobot is the time to value. We can test new ideas to quickly determine the value before we scale across markets. Now, DataRobot helps us deploy an end-to-end solution in a market in half the time we used to do it before and manage the entire AI journey"

Ram Thilak
Group Head
of Data Science and AI
